

Postdoc Day 2021  
Monday 12th April, 2 pm

---

| <b>Name</b>      | <b>Title</b>  |
|------------------|---|
| Elena Sarpa      | Velocity and density fields on cosmological scales: modelisation via non-linear reconstruction techniques and application to wide spectroscopic surveys |
| Marius Ramsøy    | Characterising intergalactic magnetic fields for multimessenger astronomy   |
| Clément Ranc     | Building a microlensing look at the planet formation theories   |
| Flora Stanley    | Investigating the role of AGN in high- $z$ galaxies   |
| Lukas Witkowski  | From cosmology to string theory and back  |
| Eder Martioli    | Exoplanetology with SPIRou  |
| Aoife Boyle      | Large deviation statistics and neutrino masses from cosmology   |
| Jacopo Fumagalli | Probing the early Universe with the stochastic background of gravitational waves  |
